

## **ATM, TECHNICAL PARTNER OF TRIENNALE MILANO**

*Milan, 12<sup>th</sup> October 2023* - ATM is technical partner of Triennale Milano for the exhibition “Gabriele Basilico. Le mie città”.

Atm supports events and initiatives that are part of a strategy which aims to promote the excellences of the city and wants to actively contribute to the creation of ideas for the development of integrated and intermodal mobility solutions.

## **The ATM Group**

With technologically advanced systems for sustainable mobility, ATM manages since 1931 the public transport service in Milan and in other 96 municipalities in Lombardy and, since 2008, the Copenhagen metro through Metro Service A/S.

ATM's integrated and sustainable mobility services have contributed to the growth of the Milan metropolitan area and today its metro, buses, trams and trolley-buses serve an area with more than 3,3 million inhabitants. The public transport network in Milan consists of 5 subway lines for a total extension of 114 km. ATM also operates 17 tramway lines with a coverage of 180 km, 160 bus routes that cover more than 1.500 km and 4 trolleybus routes.

## **Pioneers of SUSTAINABLE MOBILITY : A ZERO-EMISSION TRANSPORT**

The “Full Electric” Plan: zero emission goal and transition towards 100% electric. The company's goal is to replace the whole bus fleet with 1,200 electric vehicles. All depots will be converted and three innovative structures will be built from scratch. Around the city there are also charging infrastructures for buses at the terminus. Thanks to the “Full Electric” Plan both diesel consumption and CO2 emissions will be meaningfully reduced.
